Article 14 (2) (Information for Upper tier sites)	§ 16 Monitoring System  Major Accidents Ordinance	<i>Brochure and Internet</i>	X	

# Evaluating implementation –

**Authority** - Please briefly describe any rules or guidance followed **by authorities** in implementing their duties

We have the guidelines from our Ministry in the form of "Procedure Manuals".

We use Checklists.

**Operator** - How does the authority evaluate that the implementation **by the operator** is effective the requirement, (e.g., criteria, minimum information, frequency, methods)?

The operator is aware of his obligations under the Hazardous Incident Ordinance. This will be checked by us. The operator has to review the internal alarm and hazard prevention plans at intervals of no more than three years.

**Confidentiality** - How do we deal with the requests for confidentiality? What information do we consider as confidential? Are there any criteria developed for declaring information as confidential?

We have a catalog of questions and answers. Trade or business secrets, confidentiality of personal information and threats to public safety → We have a law on the subject (Environmental Information Act)

If you have any specific examples of a good practice, please explain it briefly here.

# Guidance and tools

If you have any guidance online, please provide the links here.
