Evaluating implementation –

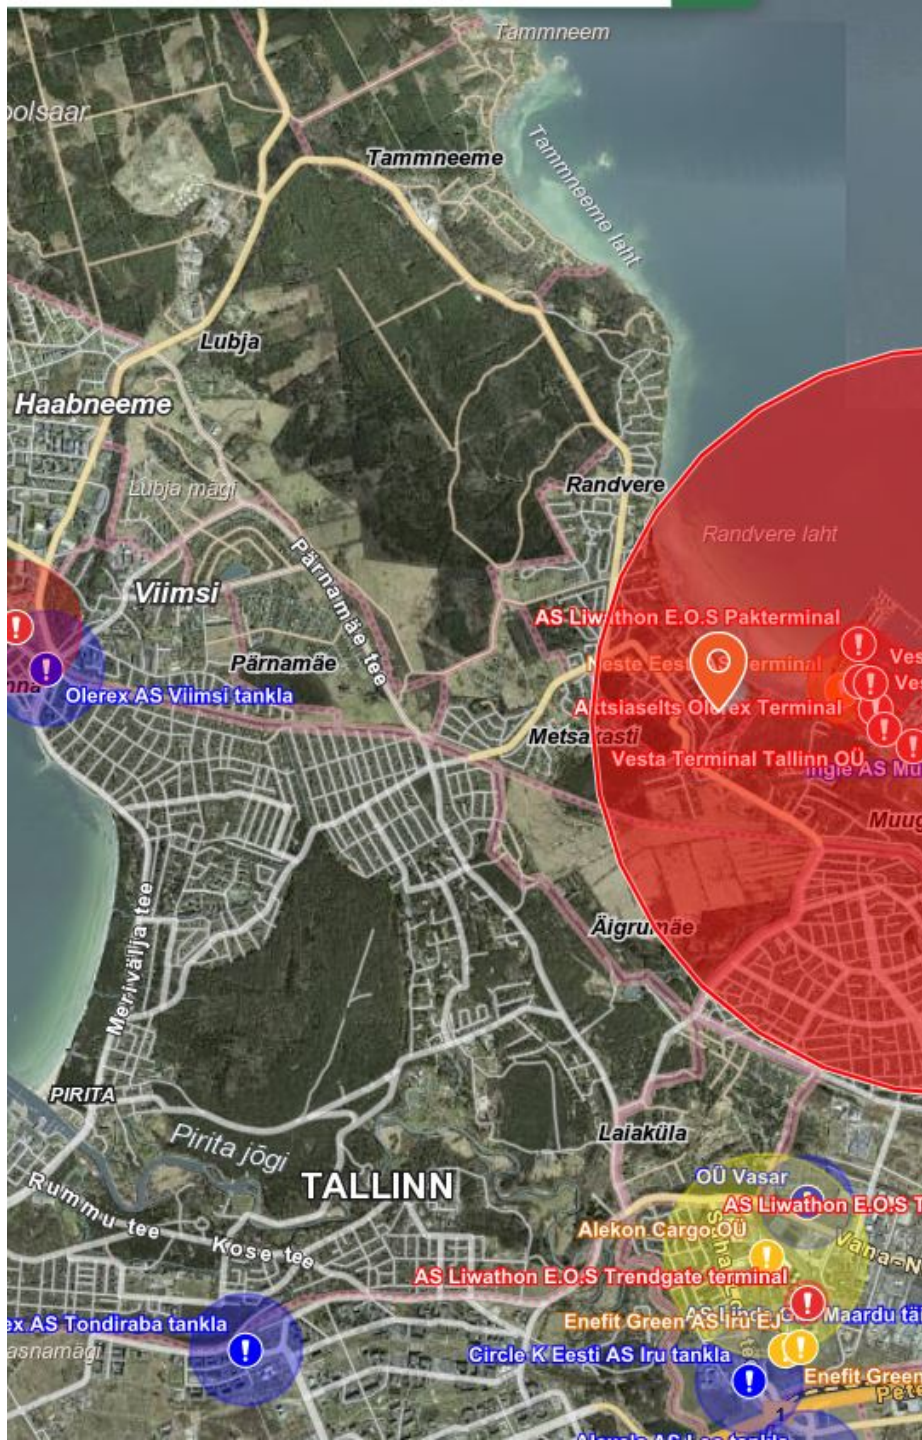

Authority – Estonian Rescue Board (ERB)

Operator – ERB assesses public safety guidelines provided by the operator, based on Regulation 18 § 6, guidelines must be reviewed in every 3 years and must be distributed to the threat zone areas. Guidelines are checked during inspections, if needed, they are updated. Guidance material provided by the ERB is freely available on the ERB website.

Confidentiality - ERB has limited information about pyrotechnics and explosives, detailed list of chemicals isn't provided in web map. Until this time, no other operator hasn't requested to have their information to be held confidential.
